

# Product Information Management in Microsoft Dynamics NAV

With Perfion PIM, you can work directly with real-time ERP information such as prices and inventories from the same place that you manage all other types of product data.

# Product Information Management in Microsoft Dynamics NAV

Perfion gives you Product Information Management (PIM)  
– 100% integrated into your Dynamics NAV ERP solution.

Using the Perfion PIM system directly in Dynamics NAV enables you to:

- ✓ Manage all of your product data in Perfion – descriptions, technical specifications, pictures, video materials, etc. – TOGETHER WITH transactional data from Dynamics NAV, all in one place.
- ✓ Dynamically generate brochures, data sheets and other marketing materials with always-updated data in a print-ready PDF format.
- ✓ Easily export product data from Perfion and Dynamics NAV to apps, websites, webshops and online portals.

*”The 100% seamless integration between Perfion, Dynamics NAV and Sana Commerce was exactly what we wanted. Perfion has made us able to structure product information and make it available for everyone”*

Marcel de Groot  
Business Unit Manager Parts  
Exalto B.V.

## The advantage of 100% PIM integration in Dynamics NAV

Working with Perfion directly in Dynamics NAV keeps your ERP system simple and streamlined. Only transactional data is stored in your ERP system – all other data is stored in Perfion. This ensures a higher degree of standardization and fewer adaptations in your ERP solution, while giving you the power to work with data from both systems at the same time.

## The advantage of fewer adaptations in Dynamics NAV

Limiting the number of adaptations in your ERP system lowers the system’s operating costs, and storing only transactional data in the ERP system improves its performance. It is also faster and easier to upgrade to new versions when you have fewer adaptations to consider.

## The advantage of creating publications directly in Perfion

When dynamically creating brochures, data sheets and other publications with Perfion integrated in Dynamics NAV, Perfion retrieves data from the ERP system at the very moment it is to be used. This ensures that all data in your new publication is valid and up-to-date.

You can also quickly generate catalogs, price lists and data sheets with content and prices adapted for specific customers. Perfion retrieves prices, products, customer and inventory information directly from Dynamics NAV, which minimizes the risk of error.

# 100% PIM integration in Dynamics NAV

## Sales-ready products are easily released from Perfon to Dynamics NAV

Given that the life of a product typically begins long before it should be registered in the ERP system, it is often useful to register new products in Perfon first.

The **Perfon Release2ERP for NAV module** makes it quick and easy to configure a release process that automatically releases products to Dynamics NAV when they meet predefined criteria. The required fields in Dynamics NAV can either be filled in automatically, or a process can be triggered so that the product is released when all business-critical information is available.

### **The advantage of registering products in Perfon first**

During the development and evaluation of potential new products, you often need to collect and store a lot of product information. However, it is important that the product avoid contact with the ERP system until it is actually ready for sale.

With Perfon as a connecting link, you avoid registering a lot of irrelevant products in Dynamics NAV, which further helps to keep your ERP system simple and streamlined.

# Master Data Management with the PIM system

All product data from Perfon is also accessible in Dynamics NAV. Some types of business data must be stored in a specific way in Dynamics NAV to ensure optimal performance. You can either:

- ✓ Use Perfon to link to live data from Dynamics NAV, or
- ✓ Use Perfon as a source of master data to keep Dynamics NAV updated.

*"Perfon is Out-of-the-Box but very configurable – it's a quite unique product in that sense in the Dynamics NAV world"*
